PRODUCT DESCRIPTION

ACDP-1 AC DISTRIBUTION PANEL

RU 6 way AC Distribution Panel

Imark Stock # [708992](#)

Features:

- 1RU Height
- 6 AC Outputs

DESCRIPTION:

The IMARK ACDP-1 AC Distribution Panel is designed for 19" Rack mounting. The mounting brackets are recessed so that the AC Plugs do not protrude beyond the 19" equipment rails. The ACDP-1 only extends 95mm behind the equipment rails and into the cabinet thus allowing the unit to be mounted on the rear equipment rails and behind equipment mounted on the front equipment rails. This is the most logical place to mount the AC Distribution panel and is the most "space effective" location method.

The IMARK ACDP-1 is only 1RU in height (44mm) and has 6 AC output sockets. The supplied AC input cable is 1.8 Metres in length.

SPECIFICATIONS:	
Input Lead	1.8 Metre 3 core suit Australian Standards
Outputs	6 Sockets to suit Australian Standards
Unit Dimensions	485 (W) x 98 (D) x 44(H) mm
